

## Case Study

# Public Sector / NHS-PCT

For over 20 years projects have been regularly undertaken within the Public Sector, this work can vary from a 32 bed hospital ward, generators for the national blood centre to temporary classroom supplies following destructive fire damage at a school and re-lighting with energy saving and dimming controls to full hospital wings.

We undertake both specified work and design build projects. We have a dedicated team of design engineers who design from scratch any size of project.

An example of recent work completed within the NHS was a high-dependency ward in Nottingham, this was a design build project and consisted of:

- Full lighting and small power services including essential and non-essential services.
- Complete fire alarm system and nurse call facility including integration into the existing hospital system.
- Installation of data and telephone system.
- Installation of new mains LV auto changeover system to supply the building testing and commissioning of all systems and facilities.

All of the above was undertaken in out of hours weekend shut-downs without any loss of production to the centres.

Grainger Electrical Services Ltd has had a long-standing relationship with many of our local councils and NHS and PCT has undertaken many projects with the council and PCT design team.

## GRAINGER

*Nationwide & Local Electrical & Mechanical Building Services Installation Contractors*

Strategy House, Claylands Avenue,  
Dukeries Industrial Estate, Worksop,  
Notts, S81 7BQ
